

PR SERIES

The ProCab's PR Series offers you a twisted assembling cable in various colours.

This series consist of a cable with 2 twisted wires, one wire is black and for the other wire you can choose out of nine colours, those nine colours come from the resistance colour code and are: brown, red, orange, yellow, green, blue, purple, grey and white.

This cable is very efficient in use when doing a 19inch rack assembling or when you don't have a lot of space for "bigger" cables. The cable is very reliable for your signal thanks to its good twisting that reduces the talkover between cables.

The PR Series of ProCab offers you a cable that cares about your assembling.

Twisted assembling cable 2 x 0,25 mm²

| | |
|-------------------------|-----------------------------|
| Cable model | PR-series |
| Type of cable | Assembling cable |
| Inner conductor | 8 x 0.20 mm |
