

SX418

Bass Cabinet

AUDAC

► Features

- 18" excursion driver
- Sophisticated control electronics
- Reliable, linear operation
- Integrated M10 screw flange speaker adapter
- Two carry handles for easy transportation
- Scratch-free textured EPDM coating
- Reinforced frame

► Applications

- High power touring applications
- Indoor fixed PA installations
- Clubs
- Theatre
- Broadcast

The AUDAC SX 418 is a top class powerful tandem ported design subwoofer for indoor applications.

Incorporating this subwoofer in any large room wouldn't be a problem. The results of the carefully designed and tuned subwoofer will satisfy most demands for high power, extreme low frequency performance at exceptionally low distortion levels.

Accurate bass does not always sound spectacular, it sounds real.

A really good sub will integrate so seamlessly into your system that it will not draw attention to itself.

This single 18 inch subwoofer with a power of 700 Watt RMS and 100 dB SPL sensitivity is capable of a maximum SPL of 129 dB with an extremely flat frequency response between 35 – 250 Hz!

The cabinet is constructed of 18 mm multi-ply hardwood and coated with scratch free, durable textured black paint coating.

Because of the high pressures which can occur inside the subwoofer, there's an complete frame mounted inside the subwoofer, to reinforce the whole construction.

Its built-in head base makes it possible to combine with any top-cabinet of your choice. The head base consists of a M10 screw flange speaker adapter.

Two Speakon NL4MP Neutrik connectors are used at the back to ensure that the best possible connections are made.

The second Speakon connector can be used to link more SX418's to each other.

► Specifications

SYSTEM SPECIFICATIONS	
Max power	1400 W
RMS power	700 W
Impedance speaker	8 Ohm
Sound pressure 1W/1m	100 dB
Sound pressure Max W/1m	129 dB
Frequency response -3dB	35 Hz - 250 Hz
Frequency range -10dB	25 Hz - 250 Hz
